

OUTDOOR EMERGENCY CARE TRAINING

Outdoor Emergency Care® is the NSP's award-winning training program for patrollers and others in the recreation community who deal with emergency situations. This nationally recognized program is designed to help you manage the toughest emergencies, in all seasons.

OEC has evolved to address the needs of other outdoor-based emergency care providers too, including wilderness medical technicians, river rafting and mountaineering guides, members of search and rescue groups, mountain bike patrollers, and parks and recreation employees.

Today, OEC is considered *the* standard of training for emergency care in the outdoor environment and is recognized by resorts and recreational facilities in all 50 states.
